

This remarkable system has the power to protect you...

Power Options

Original Quality DSC Accessories for Your Power832 and Power864 Systems

Keypads, Intercom/Monitor, and Future Zone Expansion

The intercom can also be attached to either of the keypad options - LCD fixed message and programmable, and LED. Each keypad offers adjustable tone and convenient backlight.

The programmable LCD keypad walks you through the system, giving you key information at a glance. Optional modules allow you to add more zones and features easily as your future needs change.

15 Station Intercom

Now you can communicate easily and clearly with your family from any room in the house. You can talk and listen without pressing buttons each time. And it's reassuring to know who's at your door without having to open it.

Motion & Glassbreak Detectors

Today's most accurate and reliable detectors are DSC's passive infrared (PIR) and microwave/PIR motion detectors and Acuity glassbreak detectors. Advanced technology provides immunity from interference and false alarms.

Smoke Alarm

DSC's photoelectric smoke alarm provides superior sensitivity to all types of smoke, and is designed to send an alarm to your system in case of smoke detection.

Wireless Components

DSC wireless components can act as replacements or additions to your existing wired system.

Remote Telephone Access

Control your Power832 or Power864 security system from any tone telephone, from within your home or office, or from anywhere in the world. The system's voice announcements give you complete system status and allow you to arm/disarm and control 32 automation devices, managing heating, lighting, locks and gates.

A Word From DSC's President:

"Before You Make A Choice, There's Something I'd Like You To Know About Our Company"

Back in 1979 when we started DSC, we identified the need for improved security equipment. Products which were more attractive, more reliable, more adaptable. Products which were simpler to understand and easier to use by everyone in your family or office. At that time, we made a firm decision which still governs the way we do

business today — committing our company to a higher standard of excellence in every phase of design, engineering, and assembly. That decision has been fundamental to our success and it is important to you, too. All of our products, including the PowerSeries, incorporate features and refinements that make them superior to anything else in their class, to

meet the most demanding standards. Today, millions of DSC products are used throughout North America and in over 140 countries around the world — a strong testimony to their performance and consumer acceptance. I hope that knowing this makes your choice a little easier, and I extend a warm welcome to you as you join the DSC family.

Thank you, and keep safe.

Power832[®] / Power864[™]

Security systems that keep you safe...

It used to be that a burglar alarm was all you needed to feel safe. Well, times have changed. And so have your security options.

In keeping with new times and new technologies, at DSC we've redefined the meaning of security. And we've translated this broader definition into powerful new systems that will keep you and your family safe... in ways you never imagined.

DSC's security systems are much more than reliable and easy-to-use burglar alarms. The Power832 and Power864 security systems allow you to integrate a multitude of convenience and life safety features, affording you the peace of mind you'll experience for years to come.

Home Automation

Imagine a security system that controls your home appliances.

With Power832 and Power864 systems you can adjust your heating, control the lights, open your garage door, unlock your gates, and turn on your sprinkler system... all with just a simple phone call.

You can even program your system to turn on the

lights in the event of a burglar or fire alarm.

More great ways to stay safe.

System Open:
Chris' Room

Multiple Security Systems In One

Power832 and Power864 security systems have the ability to protect 2 or 8 separate areas, e.g., your home plus a workshop, a valuable collection, or an in-law/rental apartment.

If you have a tenant, their security system will work independently of yours so your keypad won't beep when they enter their apartment.

Wireless Control

DSC's wireless security technology lets you add control from near or far, providing today's busy consumer with intelligent and reliable security, and extra convenience!

Add a wireless key to give you single-button, convenient control of your security system. Simply press 1 of 4 programmable buttons to arm the system, disarm it, or to perform other system functions as programmed.

Remote Telephone Access

While on vacation or traveling on business, there's no need to worry about your home. With Power832 and Power864 systems, you can check on your system from anywhere in the world.

With worldwide telephone access, you can control your system and instantly check on its status.

Talk about control and peace of mind!

Easy To Use

A security system is only effective if it's easy to use.

Power832 and Power864 systems offer 5 one-touch function keys with one-word commands. So when you're rushing out the door, the push of a single button will ensure your home is safe.

And with the special 'Exit' button, there's no need to disarm or rearm the system every time you leave the house or let the dog out.

...in ways you never imagined.
